

# Beyond the Rhine supplemental counters

Designer Roland LeBlanc continued research into the campaign has resulted in two sets of supplemental Allied units. These were included with later OCS games. These are extra counters, requiring no deletions or other changes to the regular arrivals.

## New French units

These units flesh out De Lattre's First Army. Five more counters round out the game: three extra truck counters (more "small" ones will be useful), an Allied Reserve marker (the published mix is regrettably short one), and a fixed German Breakdown regiment. These counters are included with *Tunisia II* and *Smolensk*.

## New Commonwealth units

These units are Anti-Tank Brigades which are each associated with a specific Corps, except for the 63<sup>rd</sup>, which has no affiliation. These counters are included with *Hungarian Rhapsody* and upcoming *The Third Winter*.
