

DAK Order of Battle

by Dean N. Essig

It is now a year before the publication of DAK, the OCS game covering the period from September 1940 to November 1942 in the Western Desert. I present the draft order of battle here for all to see so that those of you with information which might give the game even more accuracy can help out. Sources for the following include, but are not limited to, the following include, but are not limited to, Pitt's three volume *Crucible of War*, Jolsen's *Order of Battle*, Tessin's *Verbande und Truppen*, Bender & Law's *Afrika Korps*, Jack Greene's several volumes, and an assortment of work from the collections of George Nafzinger and Bill Stone. The Italian OB was compiled by Mauro De Vita and Andrea Galliano in Italy from various Italian reference sources (the names of these many volumes were provided to me, but have since been lost).

I hope you find this OOB of interest and that those of you with information come forward to correct any errors which might still exist. One thing to keep in mind is that this OOB was developed over the course of the last three years and sometimes represents compromise between several conflicting sources.

Artillery units list (where known) the numbers and calibres of guns forming the unit. For example, "24x 65" means twenty-four 65mm guns.

Some units are listed a number of times in order to show the development of unit organization and equipment. In the game, this means that a given unit might go through one or more upgrades during the course of the campaign.

Italian divisions listed without breakdown units and no starting asterisk are single-counter divisions (breakdown capability has not yet been finalized, they probably will not be able to breakdown at all). Divisions listed with an asterisk and component units will be broken down as shown. In other words, some Italian divisions will be presented by single counters (like the Russian infantry in *EatG*), others will be set up like the divisions in **Tunisia**.

My apologies for the small typesize...the thing had to fit in the space available.

An Ops Omission

Sorry about the mystery counter image in last issue's article on CWB random events. I didn't leave explicit instructions for Dean about how to set up the artillery unit in the file I provided. He included the cannon using a reasonable, but different, method and shipped the files off, only to learn when the magazine came back that the correct file was not in place.

Each Entry has the Date of LAST Revision:

1-10 Champion Hill (3 April 96)

1. For Victory Point purposes, the following hex listings are in error. References to 63.02 and 63.03 should be to 53.02 and 53.03, and 49.19 should be 50.19. The reference to 50.16 is correct, though it may look odd.

2. Ignore the reinforcements listed as arriving at 8:00 PM in Scenario 5.4. The scenario ends before they appear.

3. Treat all roads on the map as secondary roads. Those marked as primary roads were slightly better, but they are still secondary roads in game terms.

TCS Series (ver 3.1) (3 April 96)

1. The Area Fire Table's "Three Dice" result columns shifted one space to the left—each of the dice results at the right of the table is one column left of where it should be. This was corrected in the printing of these tables Black Wednesday and beyond.

2. In the example of SYRs after rule 16.2, the Morale Table die roll should be 56, not 36 and the SYR Table roll should be 3, not 4. Finally, the SYR result of the example should be Retreat 4 Hexes, -1 step", not "Retreat 5 Hexes, -1 step."

3. Step 5 of the LOS explanation (rule 8.2) should read "...greater than..." NOT "...greater than or equal to...", so as to conform to the diagram at the top of the page (which is correct).

4. The reference in 8.3c to 8.3h is in error—there is no 8.3h. Ignore the reference.

5. Vehicles and Carriers which conduct an SYR with other (presumably SYR-capable) units are not exempt from Overwatch fires—their movement generates Overwatch fires normally.

6. As an expansion to rule 17.7a, Rocket Artillery, place a barrage marker for the rocket mission long enough to resolve attacks, including artillery vs. Point target attacks against any point targets present in the rockets' zone when the mission hits. Then remove the barrage marker; it does not remain on the map to affect any targets that might pass through its zone.

2-05 GD'40 (8 Feb 96)

1. The Air Tables (on the Player's Aid) use one die—not two as the rules text indicates.

2. One of the platoons in 1-1 205 R.I. has only a "6" on the back. It should have the same "AA6" as all the other infantry platoons in the game.

3. The Heavy Infantry Guns (105mm) should be 150mm. The values on the counters are correct, only the caliber is wrong.

4. The French 67 R.I. regimental weapons come on with the 1st Bn, 67 R.I.

5. The French cannot have On-Call missions set up before play begins.

6. The Reinforced Defense Availability Table entry for the 4-II-8 Pz Company should be 0900, not 0700. This entry is for the return of this unit after its withdrawal.

7. The 16th BCP should arrive in area SW (as in Table 3.6, the Arrival Chart on the back of the rules is wrong).
